What's the most erotic thing you can think of? Is that a hump in the milk aisle? Is that Adam Tod Brown in a bathtub full of sauce? Is this a terrible alopecia-suffering female spider with multiple eyes and legs? Is that true? If that's the case, you're in luck. If this is one of the first two, maybe I can help you out there, too, send me an email later. For you arachnophiles, someone has made spider and it is much worse than the name suggests. How maybe you just read a segment on panda and saw the pictures and thought: Well, I feel bad inside, but that's not how I want to use steel wool on my brain and genitals. Keep that thought. There's a German word for that. It's AAAAGHH!! As you can see, this is the worst thing that has ever happened to you. I am sorry. Even a sweet pair of hilarious Sorens can't make up for this mug. If your penis reacts to this with anything other than a high scream like the sound of a boiling kettle, as it offers a full retreat in your stomach, then you are dirty in the shower. Your spiritual self consists of a hidden energy banished when dinosaurs stagger themselves to the death of eons ago. The story in this cinematic gem is that our main character - let's call him Russell - is a foul-mouthed gentleman looking through the boxes in the attic. He drops F-bombs and hates his job, near as I can understand. And he's being spied on by a terrible, naked arachnoid lady. Spider lady crawls out and Russell runs in a panic like anyone should, because fuck that. But when I say fuck that I don't mean how to fuck that. I just mean eew. He runs down and there's some locked gates and - it doesn't matter, but I need you to know that - there's a bulldog sitting on the other side of the gate, putting on it. I like to think that someone brought it on set that day because they seemed to hang out with their dog and thought that a dog could enjoy watching a spider shoot. Later they went out for hamburgers. One minute in the video and the spider lady on Russell. He screams, he panics, and for about 10 seconds, he enjoys the sweet sensations and arachno-BJ. There's a solid 11 minutes left of this that unfold just like every you've ever seen, just awful. It's so awful. Then she's going to end up killing him, I think, so it's a little different.
